Experience

University of Hawaii Cancer Center

- November, 2018 – present **Graduate Research Assistant**, University of Hawaii, Honolulu, Hawaii.
- Utilized compositional imaging features to improve (AUC 0.69 to 0.81) neural network breast cancer detection.
 - Performed modeling that resulted in an image based screen detected and interval breast cancer risk model.
 - Developed a custom body composition loss function which improves quantitative accuracy of deep learning reconstructed whole body dual energy X-ray (DXA/DEXA) scans.

National Aeronautics and Space Administration (NASA)

- June, 2020 – **Research Intern**, Johnson Space Center, Houston, Texas.
- August, 2020
- Wrote a python implementation of a local system transpose to standardize 3D body scan coordinates from any system.
 - Developed an algorithm to fuse 3D and DXA scans to study soft tissue and bone distribution for spacesuit fitting.

Eyegenix LLC

- August, 2015 – **Research Scientist**, Honolulu, Hawaii.
- October, 2018
- Maintained human cornea cell line and performed biocompatibility testing on bioengineered corneas.
 - Collected data and performed statistical analysis to monitor trends for quality assurance and control.

Social Science Research Institute

- Summer, 2017 **Database Engineer**, University of Hawaii, Honolulu, Hawaii.
- Constructed a relational database from a series of spreadsheets and performed SQL queries to track recidivism rates.

Hawaii Pathology Lab (HPL)

- Summer, 2011 & 2012 **Pathology Trainee**, The Queen's Medical Center, Honolulu, Hawaii.
